9. (Canceled)
10. (Amended) A chewing gum composition including ~~an~~ a water insoluble abrasive filler substance, ~~characterized in that wherein~~ the said abrasive filler substance is selected from the group consisting of abrasive silica, calcium carbonate, talc, kaolin and mixtures thereof and is encapsulated in ~~micro-spheres~~ microspheres of cross-linked alginate.
11. (Amended) A chewing gum composition according to Claim 1, ~~characterized in that wherein~~ the said ~~micro-spheres~~ microspheres have an equivalent average diameter lying between 0.6 and 1.5 mm.

12. (Amended) A chewing gum composition according to Claim 1, ~~characterized in that~~
wherein the ~~said micro-spheres~~ microspheres have an equivalent average diameter lying between
1 and 1.2 mm.

13. (Amended) A chewing gum composition according Claim 1, ~~characterized in that~~
wherein the ~~said micro-spheres~~ microspheres are present in quantities from 1% to 10% by weight
referred to the weight of the chewing gum.

14. (Amended) A chewing gum composition according Claim 1, ~~characterized in that~~
wherein the ~~said~~ abrasive filler substance is present in particles having dimensions expressed as
equivalent average diameter, lying between 2 and 100 μm .

15. (Amended) A chewing gum composition according to Claim 5, ~~characterized in that~~
wherein the ~~said~~ abrasive filler substance has a particle size lying between 6 and 10 μm .

16. (Amended) A chewing gum composition according to Claim 1, ~~characterized in that~~
wherein the ~~said micro-spheres~~ microspheres comprise from 80% to 99% by weight of abrasive
filler substance.

17. (Amended) A chewing gum composition according to Claim 1, characterized in that wherein the said micro-spheres-microspheres further include ingredients chosen from flavorings, sweeteners, active agents and mixtures thereof.
